

**College of Life Sciences Convocation**

Brigham Young University

April 2020

---

## Dean's Message

---

When I think about the beauty of life, I wonder, like Enos in the Book of Mormon, “Lord, how is it done?” (Enos 1:7). I trust that over the past few years as you have studied in the College of Life Sciences, you have been able to strengthen your understanding of life through both your study of science and your faith.

Sometimes, when these two different ways of knowing truth don't seemingly agree, it can be tempting to abandon either one or the other. However, I believe that such crises in our faith, or in our acceptance of science, happen when we force a false dichotomy into our thinking. A dichotomy is a set of two mutually exclusive alternatives. It is usually described with the words “either” and “or.” A *false* dichotomy occurs when we incorrectly think two alternatives are mutually exclusive when, in fact, they are not. For example, the person who decides to give up on God in favor of science incorrectly concludes that the two cannot both exist together. My advice to you is not to create false dichotomies for yourself.

Alma taught us that faith is *not* to have a perfect knowledge. He told us to experiment upon the word. He told us that when we experiment upon the word, we will begin to *feel* a swelling within our breasts and begin to know of its truth. But this is only the beginning. He told us to not lay aside our faith at this point but to continue nourishing the seed *with great care, with great diligence, and with patience*. If we do, he promises that the seed will take root and become a tree “springing up unto everlasting life” (Alma 32:27–41). Notice that this process takes time and patience. I hope you will be willing to invest the time and effort it takes to find your spiritual answers.

There is also uncertainty in science. In science, we make observations that lead to a hypothesis. We then devise experiments to determine if this hypothesis is supportable. We use statistics to help us make the decision but have to be willing to accept a certain probability, usually 5 percent (1 in 20), that we are wrong. In other words, there is uncertainty in this process. I hope you can live with the notion that science does not yet have all the answers.

In matters of faith and science, may I suggest that you be patient and wait for apparent contradictions to resolve themselves as your knowledge grows. If too hasty, you could make decisions with eternal consequences that are based on an incomplete understanding. In my personal journey for answers, I found comfort in the promise in the Doctrine and Covenants that when the Savior returns, He will clear up all things.

*Yea, verily I say unto you, in that day when the Lord shall come, he shall reveal all things—*

*Things which have passed, and hidden things which no man knew, things of the earth, by which it was made, and the purpose and the end thereof—*

*Things most precious, things that are above, and things that are beneath, things that are in the earth, and upon the earth, and in heaven. (101:32–34)*

I so look forward to that day, but in the meantime, I am willing to live with some ambiguity. I hope you too can be patient.

James P. Porter  
Dean, College of Life Sciences

---

## Honored Students

---

*The following students were chosen by their departments as exemplary student representatives.*

**Kaleb Glade Christensen**, from Bountiful, Utah, is graduating magna cum laude in biology. He is the son of Glade and Denise Christensen and husband of Annakiah Messick Christensen. He and Annakiah are expecting their first child, daughter Cathrynn, in August. Kaleb served in the Florida Tallahassee Mission. He was the corecipient of a CURA grant for research on the artificial evolution of *C. elegans*, a species of nematode. The research focused on whether it is possible to artificially evolve the nematodes to survive higher levels of UV radiation exposure in order to inform research on terraforming and space exploration. Kaleb is involved in political activism, especially regarding his concern for the planet and climate change. He led the movement by BYU and University of Utah students to “Light the Purple U” and traveled to Washington, DC, to lobby for a tax on carbon emissions. Kaleb worked at the Hope Clinic, helping to serve the needs of the uninsured and underserved people of Utah, and he is passionate about engaging in healthcare reform to care for the poor. After graduation he will attend the University of Rochester School of Medicine in Rochester, New York.

*“I wish to express gratitude for the support and comradery that has been shared in our class over the last several years. Although such a time can be solemn as we move on from these remarkable years, let us take comfort in the fact that because of these years, our lives will be forever changed—forever better. The knowledge we have gained has changed our behaviors, thoughts, and perceptions. Indeed, we now have more power to effect change in the world. My deepest hope is that we will not shy away from the opportunities and tasks ahead of us. Rather, let us step into the future, content only with creating the change in the world that we want to see—that God wants to see. God is on our side and will be our help.*

*“I wish to make a promise to each of you that I will live so as to represent BYU well as I go out into the world. I recognize (as should we all) that our image is now BYU’s image. We represent all who belong to the BYU family. Let us all live honorable lives that we might pay homage to our great founder, Karl G. Maeser.”*

**Zachary David Ewell**, from Perry, Utah, is graduating in molecular biology with a minor in music. He is the son of David and Karianne Ewell and the husband of Kaylee Rhodes Ewell. Zachary served in the Adriatic North Mission. He received a Heritage full-tuition scholarship. As a student researcher, Zachary has presented twice at the international annual meeting of the American Association for Cancer Research in Chicago and Atlanta. He was featured as a keynote speaker at the first ever BYU Cancer Symposium and was selected as a Simmons Center for Cancer Research fellow to intern at Tolero Pharmaceuticals in Lehi, Utah. He plays the organ and jazz piano and was invited to play at an American Guild of Organists recital that showcased Utah Valley organ talent and at a devotional with Elder David A. Bednar. He enjoys volunteering at the local hospital, hiking in Southern Utah, and playing a competitive game of Catan. After graduation he will apply to MD/PhD programs.

*“First off, I want to congratulate all the students graduating from the Department of Microbiology and Molecular Biology! These past four years have been the greatest four years of my entire life. Walking into my first class in 2016, I never could have imagined that I would come to appreciate abstract expressionism, be able to draw the human circulatory system on a notebook page from memory, or understand that cancer is really a microevolutionary process occurring in all of us throughout our lives. Learning continuously and applying our knowledge to help others are godly actions on the path of eternal progression. Because of this, we must always strive to continue honing our learning skills, pushing the bounds of our knowledge until they ultimately encompass the entire earth. We now congratulate ourselves for making it this far, completing an important segment of our lives. Still, I urge you to keep pushing forward, developing the right trajectory that will propel you throughout the eternities.”*

Visit the BYU College of Life Sciences' graduation web page to view a digital copy of this program, photos, videos, and articles in celebration of all your hard work and achievements.

**David William Hoyt**, from Ferndale, Washington, is graduating in exercise science. He is the son of John and Marsha Hoyt. David served in the Tennessee Knoxville Mission. He was valedictorian at his high school and received the Washington Scholar award. David is a member of the Phi Eta Sigma honor society and has been on the dean's list. He has enjoyed working at the Cannon Center, in the BYU Carpenter Shop, and as a teaching assistant for human physiology. When not in class, he likes participating in intramurals, hiking, woodworking, canyoneering, and anything else outside. After graduation he will attend dental school.

*"Congratulations, Cougs! After struggling alongside you for the past four years (or more), I am sincerely proud of each of us for making it to this point. While we have learned a great deal about the world and how it functions, the most important things we have learned likely did not come from a course syllabus. There were no classes on work ethic, dedication, integrity, humility, teamwork, or relationships, yet these lessons are what made college truly worthwhile to me—along with getting a glimpse into how God designed us. I hope you take the time to reflect on what it is that made your BYU experience worth the time, money, and effort. Now more than ever, we see the need for informed, selfless peacemakers in an otherwise chaotic world. Let us use our experiences here to lift and serve the communities we are headed to next."*

**Rachel Cassidy Hughes**, from Elwood, Utah, graduated magna cum laude in genetics and biotechnology. She is the daughter of Curtis and Melanie Hughes. Rachel received BYU academic scholarships and was on the dean's list. Her research, focusing on the influence of associated microorganisms on host life history traits, allowed her to contribute to five publications and present data at national and regional conferences. She also completed internships at the University of Pennsylvania and the Max Planck Institute for Chemical Ecology in Germany. Rachel was vice president of the genetics club and also worked with the Utah Valley Hospital Emergency Department. She finds balance by spending time climbing, hiking, and running. After graduation she plans to attend physician assistant school.

*"Congratulations on your graduation! Completing your degree indicates that you have learned how to learn. Your education at BYU is just the beginning of what can be a life of learning. Remember your experiences, as well as the professors, mentors, family members, TAs, and other significant individuals that helped you get this far. Most importantly, remember to pay it forward. Provide others with the opportunities and mentoring that was so graciously offered to us. Secondly, you don't have to know everything that you want right now. You also don't have to have the perfect career plan right now. Allow yourself the time and experiences that you need to properly make decisions about your future. Finally, remember that your degree becomes most meaningful when you use it to bless and improve the lives of others. You entered, you learned, and now you get to decide in what capacity you will serve."*

**Jordan Page Marshall**, from Fuquay-Varina, North Carolina, is graduating summa cum laude in public health with an emphasis in health promotion. She is the daughter of James and Kathie Marshall. Jordan received a full-tuition scholarship and was on the dean's list. She spent a semester at the BYU Jerusalem Center, went on the Europe Public Health study abroad program, attended the Society for Public Health Education (SOPHE) annual advocacy summit in Washington, DC, and participated in the Washington Seminar program as an intern at the National Center on Sexual Exploitation. She enjoys reading and attending BYU arts performances as well as some of the more obscure sporting events like gymnastics and hockey. After graduation she plans to work full-time.

*"Well, we've made it. We're graduating. There may not be a ceremony, but in lieu of that, I'd like to offer my sincerest congratulations to all of you! Whether you are the first person in your family to graduate from college or generations of your family members have been BYU graduates, I'm sorry that we won't have a chance to officially end this chapter together. Making it to this point is a great accomplishment!"*

*"It is an especially exciting time for all of us in the Public Health Department. An oft-repeated joke in the department is that nobody recognizes public health's successes; people*

*only recognize the necessity of our profession when we mess up. Right now is one of those rare times when everybody is thinking about public health. Despite the challenges we are currently facing, I find hope in the promises of church leaders that we will overcome this crisis. Good luck in all your future endeavors!"*

**Audrey Camille Morgan**, from Seattle, Washington, graduated magna cum laude in food science with minors in interdisciplinary humanities and management. She is the daughter of Kevan and Lori Morgan. Audrey served in the Philippines Olongapo Mission. She received a full-tuition university scholarship and various food science department scholarships and was on the dean's list. Audrey's hobbies include filmmaking, cooking, writing, typography, soccer, and personal finance. She is the manager of the BYU Sensory Lab and will start work as an operations analyst for Goldman Sachs in their Salt Lake City office this summer.

*"And we know that all things work together for good to them that love God, to them who are the called according to his purpose" (Romans 8:28).*

*"I want to send love to all my food science peers, lab coworkers, and family. I am so grateful that I chose to be part of this program. I love the Food Science Club, the Sensory Lab, and especially my wonderful professors. From touring a cookie factory in commodities, to making endless amounts of cake in the 251 lab, to microwaving everything imaginable in engineering, I've thoroughly enjoyed my entire experience. Graduating, especially now, can feel extremely uncertain. The verse in Romans above has been a strength for me when I feel anxious. A testimony and perspective of the eternal plan and His purpose for me has helped abate my doubts, love others more, and have faith that things will indeed work out."*

**Jacob Freeman Smith**, from Granite Bay, California, is graduating magna cum laude in physiology and developmental biology with a minor in gerontology. He is the son of Alan and Lisa Smith and husband of Shayla Robinson Smith. Jacob served in the Guatemala City Central Mission. He received the Hinckley Scholarship and the gerontology program scholarship and won a college undergraduate research award. His research project in the osteoarthritis lab resulted in the opportunity to present a poster at Experimental Biology in Orlando, Florida, as well as the primary authorship on a recent publication. Jacob participated in the BYU Gerontology Club, where he served as event director. His volunteer and internship experiences included Utah Valley Hospital, Utah Home Health and Hospice, and Community Health Connect. Jacob's favorite community service experience was initiating and leading the first Spanish Addiction Recovery Program of the Church in Provo. He enjoys participating in various athletic competitions, including an Ironman 70.3 in Santa Rosa, California, the Red Bull 400 in Park City, Utah, the Cottonwood Canyon Marathon in Salt Lake City, Utah, and the Provo Recreation Center Swim Meet. After graduation he will attend the Mayo Clinic Alix School of Medicine.

*"Congratulations, fellow graduates and friends! This is a moment to be proud of: four years of intense effort, long nights, early mornings, getting a spot in a research lab, trying to get out of organic chemistry lab, and elevated heart rates as we hiked up to campus past the Life Science Building. These are but a few of the common experiences that we shared as College of Life Sciences graduates.*

*"However, what truly unites us is our shared experience as scholars of faith and science. I hope that each of you have had mentors and teachers that have taught you how to balance these two interconnecting principles as I have had. I am grateful for those mentors, teachers, and peers that have helped me develop my tool set for evaluating and acting on evidence of all types. This will enable us to share light with those around us in the years to come. We have learned; now go forth and serve! Go, Cougars!"*

---

# Scholastic Recognition

---

*Students who received or will receive scholastic honors (summa cum laude, magna cum laude, and cum laude) will have this designation on their diplomas and transcripts after final grades are posted to their transcripts.*

## University Honors

---

*Students graduating with University Honors have completed several interdisciplinary General Education courses, performed educational service or studied in a foreign setting, written an interdisciplinary essay and a thesis, and defended their thesis in their major discipline.*

### DECEMBER 2019

Laura Jane Westhoff  
Major: Molecular Biology  
Thesis: Functional Implications of NLRP1 Variants on Autoimmune Disease

### APRIL 2020

Brian Gregory Allen  
Major: Public Health  
Thesis: Informal Alcohol Production and Consumption in Rural Malawi

Hunter Harrison Giles  
Major: Molecular Biology  
Thesis: Evaluation of a Novel Technique for Rapid Promoter Characterization in Zebra Fish

Jacob S Hogan  
Major: Bioinformatics  
Thesis: Burst Suppression: Causes and Effects on Mortality in Critical Illness

Mary-Elise Johnson  
Major: Biology  
Thesis: Does Negativity Frequency-Dependent Selection Maintain Gonopodial Asymmetry in *X. umbratilis*?

Zak Webber  
Major: Molecular Biology  
Thesis: Using Sunflowers to Provide Clean Water to Those Living in Areas Polluted by Uranium Mining

### JUNE 2020

Annie Addison Pitts Armitstead  
Major: Physiology and Developmental Biology  
Thesis: Lateral Flow on Printer Paper: Low-Cost Diagnostics

Hyrum Surya Eddington  
Major: Bioinformatics  
Thesis: Predictors of Psychosocial and Physiological Distress in Colorectal Cancer Patients

William Hunter Sutherland  
Major: Microbiology  
Thesis: Exploring Melatonin as a Treatment for Oral Ulcers

### AUGUST 2020

Isabella Marie Romano-Errigo  
Major: Environmental Science  
Thesis: Mapping Waterborne Pathogens in Ecuador to Reduce Infection and Elevate Quality of Life

Linda Loyda Ida Tovar  
Major: Public Health  
Thesis: Qualitative Analysis of Caregivers Receiving an Educational Intervention on RHD in Samoa
