```
================================================================================
Project Code: BYUC0039
Project Name: AFS 2025
Prepared for: Jeremy Pope
Interviews: 3000
Field Period: August 06, 2025 - August 18, 2025
Project Manager: Sara Sermarini, sara.sermarini@yougov.com
================================================================================
```

YouGov interviewed 3317 nationally-representative respondents who were then matched
down to a sample of 3000 to produce the final dataset. The respondents were matched
to a sampling frame on gender, age, race, and education. The frame was constructed
by stratified sampling from the full 2023 American Community Survey (ACS) 1-year
sample with selection within strata by weighted sampling with replacements (using
the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The
matched cases and the frame were combined and a logistic regression was estimated
for inclusion in the frame. The propensity score function included age, gender,
race/ethnicity, years of education, region, and home ownership. The propensity
scores were grouped into deciles of the estimated propensity score in the frame and
post-stratified according to these deciles.

The weights were then post-stratified on 2020 and 2024 presidential vote choice as
well as a four-way stratification of gender, age (4-categories), race
(4-categories), and education (4-categories), to produce the final weight.

*The demographic marginals and their interlockings were based on the sample frame.
The marginal distribution of 2020 presidential vote choice and its demographic
interlockings were based on a politically representative "modeled frame" of US
adults, using the 2019 American Community Survey (ACS) public use microdata file,
public voter file records, the 2020 Current Population Survey (CPS) Voting and
Registration supplements, the 2020 National Election Pool (NEP) exit poll, and the
2020 CES surveys, including demographics and 2020 presidential vote. The marginal
distribution of 2024 vote choice was based on official ballot counts compiled by
the University of Florida Election Labs and CNN. Demographic interlockings for 2024
vote choice were based on CNN's 2024 Exit Polls.

MAR005                     Marriage in trouble
MAR006                     Marriage in trouble (1)
MAR007                     Marriages generally
MAR013_1                   Marriage battery -- When more people are married,
                           society is better off.
MAR013_2                   Marriage battery -- Marriage is more of a burden
                           than a benefit to couples.
MAR013_3                   Marriage battery -- Marriage is needed in order
                           to create strong families.
MAR013_4                   Marriage battery -- Being legally married is not
                           as important as having a personal sense of
                           commitment to your partner.
MAR013_5                   Marriage battery -- Marriage is old-fashioned and
                           out-of- date.
MAR013_6                   Marriage battery -- Marriage makes families and
                           children better off financially.
MAR013_7                   Marriage battery -- Marriage is for life, come
                           what may.
MAR013_8                   Marriage battery -- Marriage is mostly for people
                           who are having children.
MAR013_9                   Marriage battery -- Marriage is more important
                           than a career to finding happiness in life.
MAR013_10                  Marriage battery -- There are more advantages to
                           being single than to being married.
MAR014                     Family relationship in trouble
MAR015                     General family relationships
CHD002                     Desire children
PAR003_1                   Raising Children Battery -- The cost of raising a
                           child/children is affordable for most people.
PAR003_2                   Raising Children Battery -- Children are better
                           off if they have two married parents.
PAR003_3                   Raising Children Battery -- It is sometimes
                           necessary to discipline a child with a good, hard
                           spanking.
PAR003_4                   Raising Children Battery -- It is important for
                           parents to pass on their political values to
                           their children.
PAR003_5                   Raising Children Battery -- Parents should set
                           boundaries on media consumption for their
                           children.
